E- LIQUID INDUSTRY

Blends Ltd offer an award winning range of flavours and ingredients, specially developed for the eLiquid industry. We offer Flavour Enhancers providing controlled flavour release to improve the vape experience and mask unwanted flavours.

Our flavours come with full TPD support, including the qualitative and quantitative release of CAS, EINECS and FEMA Data. The quest to discover the finest, most exceptional flavours of the highest quality is one we embark on together with our customers. We are constantly innovating and evolving to create a broader range of new and exciting flavours with different sensory experiences for vaping.

When it comes to developing eLiquid flavours, Blends Flavours & Colours are passionate about creating unique sensory experiences for every kind of Vaper. We understand that your vape needs change, depending on the time of the day, your mood, what you're doing, where you are and even who you're with. In order to understand what works for you and why, we've had to combine the Arts of Science, Sociology and Psychology to create an exceptional range of high performance eLiquids to suit your every need.

Whether that's a "quick fix" or an "all day vape" we can guide you through the process to produce the best juice for your brands and your consumers. It's where Science meets Art that the magic begins, changing your perceptions, tricking your brain and delighting your tastebuds.

This is where Blends can provide the catalyst for the most authentic, fascinating, innovative and exciting flavours in the vape world. We encourage you to make the magic happen!

FLAVOUR BOOSTERS & ENHANCERS

We developed Boosters and Enhancers to tweak our Flavour Concentrates and Blends. They can enhance creamy notes and mellow out sourness and help you adjust flavour levels to your required taste.

VAPE ENHANCER: A Sweetener based on ethyl maltol;

VAPE FIZZ: Adds acidity with a slight carbonation feel;

VAPE SOUR: Ideal for making fruits, sherbets and citrus more acidic;

VAPE TART: Adds a really nice tart/acidity great with fruits;

VAPE TINGLE: Give your vapes a mouth feel tingling sensation, brings out the fizz in sodas etc;

BAKE BOOST: Enriches biscuit and pastry notes;

BERRY SWEET: Perfect with berries or red fruits;

BITTER BOOST: Used with alcohol type flavours this enhances the boozy profile of the vape;

BROWN BOOST: Used with sweet flavours to add a caramel type note;

CREAM SWEET: Adds an indulgent richness to vanilla or milky tones;

DAIRY SWEET: Perfect for enhancing dairy and ice cream type flavours;

RED SWEET: Adds depth and body to berries and currants;

VANILLA BOOSTER: Softens out any lingering brown tones;

E-LIQUID RANGE

Mints, Menthols and Cool Fruits Range
